

Concerning the National Association of Broadcasters petition 04-160, I respectfully request and strongly urge the FCC to reject this petition. I have been a satellite radio listener for several years, and chose to subscribe to this service due to my dissatisfaction with over the air radio broadcasts. Satellite Radio, and more recently the local traffic and weather channels, provides the variety and quality that is simply available no where else. I strongly believe I have the right to purchase this service, and further believe organizations such as the National Association of Broadcasters have no right in dictating what I can and can not have available.
